

Jøtul F 370 Concept

reddot design award

winner 2007 – best of the best

Unique cast iron design

Welcome to the presentation of our latest range of stoves, the Jøtul F 370 Concept. The stoves have innovative shapes and details with exciting diverse materials. Large side glasses give a fantastic view of the flames, and the top-of-the-range model Jøtul F 373 can be rotated 360° when it is fitted with a flue outlet at the top and the optional turn plate.

red dot design award – best of the best

2,548 international branded products were evaluated in the 'product design class' for the German design award "red dot" in 2007. Jøtul F 373 emerged as one of the winners along with products from Porsche, Prada and Apple ipod. With this award, over 20 of the world's foremost design experts have placed Jøtul on an equal footing with many of the world's most exclusive and well-known brands. "red dot" dates back to 1955 and is awarded annually for outstanding design across several categories. In the past, other Norwegian products have received the 'red dot design award', but the highest commendation 'red dot: best of the best' has never before been given to a Norwegian product.

The Jøtul F 370 concept was launched in June 2006 and has been the biggest sales success of Jøtul's 154 year-long history. The stoves are designed by Anna Øren in Hareide Designmill in Moss, Norway. The Jøtul F 370 Concept has also received the Norwegian Design Council's Award for Design Excellence and the Vesta Award in USA.

Choice of models

The Jøtul F 370 range features three main models with a variety of leg sets. All the models can be made more exclusive by adding elements made of soapstone and glass.

One unique option is that the stoves can be fitted with an additional glass front panel. This lowers the surface temperature also on the front glass. All models come in grey and black paint.

Fairy tale

Unique to this concept are decoration panels for the side windows. You can choose between a classic design "fairy tale" and a contemporary design "reed". The decoration panels can be easily removed and fitted when so desired.

with soapstone top*

Jøtul F 371

This version has a leg set in cast iron. The shelf in the base can be removed when so desired. The stove comes in grey and black paint, and an optional top plate in soapstone makes it even more exclusive.
